How to Check IPO Allotment Status 2026

Step-by-Step Guide for All Registrars — KFintech | Link Intime | BigShare

BSE | NSE | Broker App | Registrar Portal

For Educational Use Only

Chapter 1 — What is IPO Allotment and When Does It Happen?

IPO allotment is the process through which shares are distributed to investors after the subscription window closes. When more investors apply than there are shares available — which happens in most quality IPOs — SEBI-mandated rules determine who receives shares and how many.

Under SEBI's current T+6 listing framework, allotment is finalised approximately 4 working days after subscription closes. This is the T+4 day. Shares are credited to Demat accounts on the same day, and ASBA blocks are released for non-allotted applicants.

T+6 IPO Timeline

Day	Event	What Investors Should Do
Day 0 (T)	Subscription closes	Ensure UPI mandate was approved
Day 1-3	Application validation by registrar	Nothing — wait
Day 4 (T+4)	Allotment finalised and published	Check status on registrar portal
Day 4	Shares credited to Demat	Verify in broker app
Day 4-5	ASBA blocks released (non-allotted)	Check bank balance

Day 6 (T+6)	Listing — trading begins at 10 AM	Decide: sell or hold

Chapter 2 — Method 1: Check on Registrar Website

The most direct method is to check on the registrar's official website. Every IPO has a designated registrar appointed by the company. The three most common registrars for Indian IPOs are KFintech, Link Intime (MUFG Intime), and BigShare Services.

KFintech (Most Common for Large IPOs)

Website: kfintech.com. Go to Investor Services section, click on IPO Allotment Status. Select the IPO name from the dropdown. Enter your PAN number or Application Number. Click Submit — status appears immediately.

Link Intime / MUFG Intime

Website: linkintime.co.in. Navigate to Public Issue section, click IPO Allotment Status. Select the company name. Enter PAN or Application number. Click Submit. Knack Packaging (July 2026) uses MUFG Intime as registrar.

BigShare Services

Website: bigshareonline.com. Go to Investor section, click IPO Allotment. Select issue name. Enter PAN number. Click Submit. Metalic Technoforge (July 2026) uses BigShare as registrar.

Registrar Quick Reference

Registrar	Website	Common 2026 IPOs
KFintech	kfintech.com	Gulf Lloyds India, Clay Craft India, Liotech Industries
MUFG Intime (Link Intime)	linkintime.co.in	Knack Packaging, Merritronix
BigShare Services	bigshareonline.com	Metalic Technoforge, Advit Jewels
Cameo Corporate	cameoindia.com	Diksha Polymers, several SME issues
Purva Sharegistry	purvashare.com	Various SME issues

■ **Find Direct Registrar Links for Every IPO Allotment at: https://ipocracker.com**

IPO Cracker links directly to the registrar portal for every active IPO.

Chapter 3 — Method 2: Check on BSE / NSE Portal

Both BSE and NSE maintain allotment status portals that work for all IPOs listed on their respective exchanges. This is an alternative if you do not know which registrar handled the specific IPO.

BSE Allotment Status

Go to bseindia.com. Click on Investors in the top menu. Select Application Status. Choose the IPO name from the dropdown list. Enter your PAN number or Application Number. Click Search. Allotment status appears immediately if the basis of allotment has been finalised.

NSE Allotment Status

Go to nseindia.com. Navigate to the IPO section. Find the closed issue. Select Allotment Status. Enter PAN or Application Number. Submit. NSE shows results for all issues listed on NSE and NSE Emerge.

Exchange	URL Path	Works For
BSE	bseindia.com > Investors > Application Status	BSE Mainboard + BSE SME issues
NSE	nseindia.com > IPO > Allotment Status	NSE Mainboard + NSE Emerge issues

Chapter 4 — Method 3: Check on Your Broker App

The most convenient method for most retail investors is checking allotment status directly inside the broker app they used to apply. All major brokers in India show IPO allotment results within the app.

Broker	Where to Find Allotment Status
Zerodha	Console.zerodha.com > IPO > Applied IPOs > Check Status
Groww	Groww App > Explore > IPO > Past IPOs > Select Issue
Upstox	Upstox App > IPO > Subscribed > Select Closed IPO
Angel One	Angel One App > IPO > Applied IPOs > Status
5paisa	5paisa App > IPO > My Applications > Status
HDFC Sky	HDFC Sky App > IPO > Application Status
ICICI Direct	ICICI Direct App > IPO > My IPO Applications

Chapter 5 — Understanding Allotment Status Messages

When you check allotment status on any platform, you will see one of several possible results. Understanding what each status means helps you take the right next step.

Status Message	What It Means	What to Do
Allotted / Shares Allotted	You received shares in the lottery	Check Demat account by evening
Not Allotted	Lottery did not select your application	ASBA block auto-released in 1-2 days
Application Not Found	PAN or number entered incorrectly	Re-check PAN — try application number
Invalid Application	Application rejected before draw	Check for duplicate PAN or UPI mandate failure
Awaiting Allotment	Basis of allotment not yet finalised	Check again on allotment date
Partial Allotment (SME)	Received fewer lots than applied for	Normal for SME proportionate system

■ Track IPO Allotment Dates and Status Links for Every IPO at: https://ipocracker.com Allotment dates and direct registrar links updated for every active issue.

Chapter 6 — What Happens After Allotment is Confirmed

Once allotment is confirmed and the status shows shares allotted, the process continues automatically. No action is required from the investor.

Shares Credited to Demat

Shares are credited to your Demat account (CDSL or NSDL) by end of allotment day (T+4). You can verify by checking your Demat holdings in your broker app or through CDSL Easeas / NSDL Speed-e portals.

Listing Day — Trading Begins

On T+6, the stock lists on BSE/NSE at 10:00 AM. Your broker app will show the shares as tradeable from that time. You can choose to sell on listing day to capture listing gains or hold for long-term appreciation.

ASBA Release for Non-Allotted

For investors who did not receive allotment, the blocked amount is released on allotment day (T+4) or the next working day. For UPI-based applications, the release is automatic through your bank.

Chapter 7 — Common Reasons for Invalid Application

An invalid application is excluded from the allotment draw entirely. These are the most common reasons applications get rejected in Indian IPOs.

Reason	What Happened	How to Prevent
UPI Mandate Not Approved	Applied but did not approve payment in UPI app	Approve mandate immediately after submitting — check UPI ap
Duplicate PAN Application	Same PAN applied from 2 broker platforms	Apply from one broker only per PAN per IPO
Insufficient Balance	Account balance dropped below blocked amount	Maintain Rs 500-1000 buffer above blocked sum
Bid Below Cut-Off Price	Bid at specific price lower than final issue price	Always select cut-off price for retail applications
Wrong Demat Account	Incorrect DP ID/Client ID in application	Verify Demat details in broker app before submitting
Application After Cut-Off	Submitted after 5 PM on last day	Apply by 3 PM on Day 3 to allow mandate approval time

Frequently Asked Questions

Q: When exactly is IPO allotment announced after subscription closes?

A: Under SEBI's T+6 framework, allotment is finalised on T+4 — 4 working days after subscription closes. If an IPO closes on Monday, allotment is typically announced by Friday. The exact allotment date is published on the company's RHP and on IPO tracking platforms before subscription even opens.

Q: Can I check allotment status before the official allotment date?

A: No. The registrar only publishes allotment data after the basis of allotment is finalised. Checking before that date returns no results or shows 'awaiting allotment'. Always check on or after the official allotment date.

Q: What if my status shows 'Application Not Found'?

A: First, recheck the PAN number entered — a single digit error gives this result. If PAN is correct, verify in your broker app that your bid was successfully submitted and the UPI mandate was approved. An unapproved mandate means the application was not processed.

Q: How long does ASBA release take after non-allotment?

A: For UPI-based applications, ASBA blocks are typically released on allotment day (T+4) within a few hours of the basis of allotment publication. For bank ASBA applications, it may take one additional working day.

Q: Does applying for more lots increase my chances in a Mainboard IPO?

A: No. In oversubscribed Mainboard IPOs, SEBI mandates a lottery where every retail applicant has equal probability of receiving exactly one lot — regardless of how many lots they applied for. For SME IPOs, allotment is proportionate, so more lots does result in more shares allotted.

DISCLAIMER

1. Not Investment Advice

This document is for educational purposes only and does not constitute investment advice, financial advice, or professional financial guidance.

2. No Guarantee of Returns

IPO investing involves market risk. Past allotment or listing data does not guarantee future performance. Capital loss is possible.

3. Read the RHP

Always read the Red Herring Prospectus before applying to any IPO as required under SEBI ICDR Regulations 2018.

4. Allotment Risk

Applying for an IPO does not guarantee allotment. In oversubscribed Mainboard issues, allotment is by computerised lottery. ASBA funds are blocked but not debited unless allotment is received.

5. Consult a SEBI Advisor

Consult a SEBI-registered investment advisor before making investment decisions.

For educational purposes only. IPO investing involves market risk. Not regulated by SEBI.
